

An ISO 9000 Company

## MILLWRIGHT POSITION

Since 1956, Morbern has been creating breakthroughs in the performance fabric industry. In addition to working directly with customers, Morbern partners with universities and other organizations for research and development projects that advance manufacturing and product capabilities. Recent work includes projects with the National Research Council in Ottawa, Queen's University and University of Toronto.

### Responsibilities:

- Install, Troubleshoot and repair plant machinery and equipment.
- Machine simple parts or regrind rubber rolls to repair plant machinery and equipment.
- Dismantle, overhaul and re-assemble plant machinery and equipment with a minimal supervision.
- Adjust brakes, clutches and variable speed drives to ensure efficient operation.
- Perform preventive maintenance (P.M.) inspections, including the accurate completion of the provided checklists, as assigned, on the plant's machinery and equipment.
- Safely move heavy machinery and equipment using accepted rigging techniques as well as forklifts and/or hoists.
- Adhere to all Health & Safety policies.
- Install pipe work, valves and fittings.
- Complete project work including simple machining, fabrication and installation work which may be required.
- Assist with training and development of maintenance personnel in the apprenticeship program.
- Provide shift coverage, as required; ensuring that machine downtime is minimized, and plant safety systems are functioning properly including the plant's fire protection system.
- Ensure that the maintenance work is done in a safe manner and that the both the work area and shop are kept clean and free of hazards. Maintain good housekeeping in the work areas.
- Assist the Charge Hands and Mechanical & Electrical Supervisors with the investigation and resolution of equipment problems; making recommendations on how and what repairs should be done.
- Produce simple layout and dimensional drawings.
- Fabricate roll journals and other complicated machine parts required ensuring proper bearing fits and tolerances.
- Perform work at elevated heights using scaffolding, scissor lifts and ladders.
- Maintain and supply personal tools.
- Repair and fabrication welding as required using arc & oxy equip.
- Any other job assigned by the Manager or Supervisor
