Ms. Carlene Whittingham  
Ontario Investment Office  
Ministry of Economic Development and Growth  
Ministry of Research, Innovation and Science

Dear Ms. Whittingham;

Re: Site located at 1500 Industrial Park Drive in Cornwall, Ontario

The purpose of this letter is to outline the municipal servicing for the aforementioned site. This letter will provide detail for each the sanitary, storm and watermain servicing.

1500 Industrial Park Drive is serviced with water by a 300mm Ø PVC stub connected to a 600mm Ø concrete pressure pipe located on Tenth Street. **No pressure information is to be provided.**

Sanitary servicing consists of a series of 150mm Ø and 250mm Ø PVC pipes that lead to a 675mm Ø PVC sanitary sewer on Tenth Street. Sufficient wastewater capacity has been allocated to the site in the 675mm Ø trunk sewer. **Exact capacity information for the sewers is not provided.**

The storm sewer network range from 750mm PVC to larger sizes of reinforced concrete maxing out at 1500mm. On site drainage is managed by all pipes leading to the stormwater retention pond for storage and quality treatment.

Please see attached site plan outlining all services and sewer pipes to the site.

If you have any further questions, please do not hesitate to contact the undersigned.

Regards,

Michael Fawthrop, P. Eng.  
Division Manager, Infrastructure Planning
