

JOB POSTING – CIVIL / STRUCTURAL ENGINEER

EFI is a multi-discipline engineering firm, providing engineering design, drafting, 3D modelling and project management services to clients in the commercial, industrial and municipal sectors.

EFI is currently looking for a Civil/Structural Engineer to join our team in Cornwall, ON. This position will be responsible for the design and review of a variety of infrastructures for new construction and re-development projects.

Location: Cornwall is strategically located in Eastern Ontario on Hwy 401; one hour from Montreal & Ottawa, 4½ hours from Toronto, 3½ hours from Quebec City and having a border crossing to the USA. The City of 46,000 has much of the amenities of a larger centre.

Work hours: Full time position, 37½ hours per week.

Benefits include:

- Competitive wages based on experience
- Group Health insurance – covered 50%
- Life insurance – covered 50%
- Paid vacation – based on years of service
- Health & Safety training

Qualifications for the position include:

- Professional Civil / Structural Engineer registered in Ontario (or any Canadian province or territory),
- Minimum of 8 years experience in North American commercial and/or industrial business sectors,
- Able to take projects from inception to completion,
- Ability to travel and work flexible hours to meet business need,
- Ability to travel freely to the USA,
- Valid Canadian driver's license,
- Working knowledge of the latest Ontario Building Code and OPS standards,
- Ability to use structural design software (RISA suggested),
- Excellent interpersonal skills with the ability to work with clients and staff in a team environment as well as independently,
- Able to communicate with staff & clients in English, both written and verbal (French is an asset).

Responsibilities include:

- Discipline leader for civil / structural design group,

34 South Branch Road
Cornwall ON K6K 1T4

Fax: (613) 936-8451
e-mail: engineer@efiengineering.com

- Prepare new and revised Site Plans, Storm Water Management Plans, grading plans and parking lot design with a working knowledge of applicable codes and standards,
- Prepare reports (proposals, feasibility studies, etc.) and perform design calculations and sketches for conceptual, preliminary and detailed engineering designs, such as concrete footings & foundations and steel and/or timber structures,
- Actively participate in the design process and provide direction to the technical team to produce construction ready drawings,
- Liaise with clients, municipalities and Authorities Having Jurisdiction (AHJ),
- Perform site visits, field investigations, compose reports and design briefs,
- Perform field inspections and reports for conformity with the design drawings.

This position offers an attractive base salary and significant growth opportunities for the right candidate. Qualified individuals are invited to forward their resume, including references and cover letter, to:
