## **JOB POSTING**

### **Quality Control Technician**

Evotech is currently recruiting for a Quality Control Technician. Please view the following job description:

#### **1. Position**

Job Title: Quality Control Technician

Immediate Supervisor: Manager, Research and Development

#### **2. Main Responsibilities**

Reporting to the manager, R&D, the technician is responsible for ensuring product quality for work in process, finished products and raw materials by following established methods and procedures.

#### **3. Tasks**

- Sample and assess product compliance;
- Approve or reject batches;
- Take corrective measures when noncompliance is detected and advise the immediate supervisor;
- Inspect raw materials to ensure they comply with established company standards;
- Inspect and evaluate expired products and those under quarantine;
- Ensure production procedures are followed and inform the production supervisor of any deviation from the specified standards;
- Produce and manage documentation and work ledgers;
- Provide technical support to the production team in order to ensure that products meet established quality specifications;
- Participate in the continued improvement of the products and work processes;
- Calibrate and maintain quality control equipment;
- Maintain the workplace clean and safe;
- Accomplish all other tasks related to the quality control laboratory.

#### **4. Requirements and Prerequisites**

- A college degree in analytical or industrial chemistry (DEC for Quebec) or more advanced studies;
- A minimum of at least three (3) years of similar experience in manufacturing, ideally in the area of industrial paints;

- Good colour perception;
- Proficient in MS Office suite software (Word, Excel, Outlook);
- Experience in colorimetry and spectrophotometer knowledge and X-Rite software use – as asset;
- TDG and WHMIS certification – an asset.

5. Key Competencies Required

- Excellent analytical and synthesis skills;
- Sense of urgency and ability to manage multiple projects at the same time;
- Excellent organizational and priority management skills;
- Excellent communication and interpersonal skills.
